- Ballast water treatment (BWTS)
- Corrosion protection (ICCP) and marine growth prevention (ICAF/MGPS)
- Oily water separation and environmental systems
- Stainless-steel drainage and marine flooring
- Hot-water systems, freshwater generation, spares and retrofit

SELECTED REPRESENTED TECHNOLOGIES

EVAC · Cathelco · ERMA FIRST · EPE · BLÜCHER · Gerflor Streamo

WHY PARTNER WITH MITSA?

One local counterpart from specification to operation. MITSA combines access to the Chilean maritime market with local technical execution and direct coordination with international manufacturers. We do not leave projects orphaned after delivery.
